

GÖTTI DIMENSION / COLLECTION WINTER 25-26

Karim and Karina Contrast with charisma

With KARIM and KARINA, Götti Dimension focuses on the harmonious interaction of two materials. The contrast between the silky-matt surface and the cold metal creates a look that is both modern and elegant. For anyone who values subtle sophistication.

KARIM and KARINA combine a 3D-printed front part with delicate stainless steel temples – a combination that brings a natural sense of lightness. Thanks to the matte surface, even intense colors have a subtle, elegant effect. The fine stainless steel temples are stylish and subtly tuned, available in matte or shiny finishes. Clean lines and a minimalist design draw the attention to the essentials: two calm, timeless frames that are somewhere between retro and modern. A subtle statement – minimalist, confident, elegant.
