

GÖTTI SWITZERLAND / COLLECTION SUMMER 26

HAUTE CONTOUR

The design of elegance.

The new HAUTE CONTOUR fashion collection from Götti Switzerland combines timeless elegance with uncompromising craftsmanship. These are glasses that stand for something very special. Each pair of glasses is a hand-polished masterpiece made from high-quality acetate – with harmonious lines, perfected curves, and a unique finish. A combination of state-of-the-art technology and traditional craftsmanship that creates a link between everyday life and the world of luxury – artistic, exclusive, unmistakable.

Sophisticated lines and curves create an elegant and defined design that reflects the pursuit of aesthetic perfection. The soft contours allow light to flow gently across the surface, revealing the depth of the material and exposing the soul of the design. Despite their pleasantly delicate feel, the frames have a striking bold look that highlights their contours while leaving room for individual character. Strong in shape, subtle in statement.

Precise craftsmanship meets pure passion to create exclusive collector's items. Each pair of glasses is made from high-quality acetate and crafted into wearable works of art by experienced polishing artists. Patient handwork creates a unique finish that not only makes the glasses shine, but also exudes a tangible sense of luxury. Craftsmanship perfection down to the last detail.

High-quality rivets in silver and gold underline the attention to detail and make the temples a special highlight. As a personal mark of quality, the name of the polisher is engraved on the inside of the temples. The lenses, available in a subtle brown gradient or as tinted sunglasses, are enhanced by a second engraving of the logo. This creates a modern fashion statement.
