NEW YORK

rag & bone eyewear

Spring/Summer '26

rag & bone represents an authentic expression of modern style, grounded in craftsmanship, quality, and an effortless New York sensibility. Guided by a design philosophy that favors timelessness over trend, the brand's eyewear collection, developed in partnership with Marcolin, extends this ethos into a refined assortment that feels personal, wearable, and enduring.

Designed for the premium fashion consumer, rag & bone eyewear delivers modern luxury through thoughtful design and elevated materials. Subtle nods to the brand's denim heritage are woven throughout the collection, from rivet-inspired accents and custom metal hardware to denim-branded logo details. Each frame is engineered to balance durability, comfort, and elevated design for everyday wear.

The collection is structured around three distinct design clusters—Urban, City, and Casual—each reflecting a different facet of the brand's identity. From clean, minimalist silhouettes and denim-inspired styles with hardware detailing to bold, modern shapes that feel fashion-forward yet approachable, the assortment offers a cohesive range that speaks to multiple consumers while remaining true to rag & bone's understated New York aesthetic.

SUN COLLECTION

RB00001 – STEVIE

This frame features a bold, wraparound-inspired silhouette with a sleek, aerodynamic profile and a curved brow line. The design is characterized by a substantial acetate structure and wide, tapered temples adorned with the five-dagger logo, creating a high-fashion, athletic aesthetic.

RB00003 – JENNIFER

This frame features a sculptural, geometric cat-eye silhouette with a dramatic, peaked brow line and a thick, tapered lower rim. The design is built from substantial acetate and features wide temples accented by the five-dagger logo, creating a bold, high-fashion look.

RB00005 – BROOKLYN

This frame features a sculptural, rectangular silhouette with a slightly angled brow line and distinct, geometric corners. The design is defined by a substantial acetate construction that utilizes a wide, tapering temple design and prominent industrial-style metal hinges for a bold, structured look.

RB00007 – MILEY

This frame features a sculptural, rounded-oval silhouette with a distinctive, chunky profile and a smooth, continuous brow line. The design is characterized by a substantial acetate construction that gives the rims a thick, tube-like appearance, paired with wide temples and prominent industrial-style metal hinges.

RB00008 – CHRISTINE

This frame features a sleek, almond-shaped oval silhouette with a slightly upswept brow line that creates a subtle cat-eye effect. The design is characterized by a polished acetate construction featuring medium-width temples adorned with distinctive, metal buckle hardware for a luxurious, decorative touch.

RB00010 – GRAYSON

This frame features a modern, teardrop-inspired aviator silhouette with a slightly flattened brow line and a distinctive double-bridge design. The structure is crafted from a refined acetate and is reinforced by a slender metal top bar, creating a sophisticated blend of materials.

RB00012 – DAVID

This frame features a sleek, rectangular profile characterized by a sophisticated "frame-within-a-frame" construction. The design is defined by an inner metal eye wire and a prominent double bridge, both encapsulated within a translucent acetate structure.

RB00013 – AMBER

This frame features a modern, geometric butterfly silhouette with an upswept brow line and softened, angular corners. The design is characterized by a sleek metal construction with a matte finish and features textured, architectural temples for a sophisticated, technical look.

RB00015 – MARCUS

This frame features a sleek, geometric navigator silhouette with a distinctive flat-top brow line and a deep, architectural bridge. The design is characterized by a substantial acetate construction that maintains a uniform thickness throughout the frame front and into the tapered temples.

RB00018 – REBECCA

This frame features a sharp, dramatic cat-eye silhouette with a pronounced upward sweep at the outer corners. The design is characterized by a refined, thin-profile acetate construction that maintains a sleek and lightweight appearance from the brow line through to the slim temples.

RB00019 – RYAN

This frame features a classic, wire-rimmed aviator silhouette with a distinctive, squared-off lens shape. The design is defined by a minimalist, ultra-thin metal construction and features an intricate double-bridge design with a textured acetate accent on the top bar.

RB00020 – KYLE

This frame features a modern, geometric front silhouette. The design is defined by an ultra-thin, minimalist metal rim construction featuring nose-pads and slender temples with a sleek, step detail at the hinge.

OPTICAL COLLECTION

RB50002

This frame has a structured rectangular eye shape with slightly softened corners, giving it a clean, contemporary profile. The medium-thick acetate front is balanced by wide, sculpted temples, while the subtle logo detail adds a refined brand touch. Overall, the design feels modern and versatile with a confident, everyday wearability.

RB50003

This frame showcases a bold squared eye shape with slightly rounded edges, softened by a classic acetate front. The thick construction is balanced by clean lines, a subtle bridge, and refined RB metal hinge details for a polished finish. Overall, it blends timeless styling with a strong, modern presence.

RB50006

This frame features a structured rectangular shape with slightly softened corners for a clean, modern profile. The thick acetate construction and subtle metal hinge detailing give it a bold yet refined aesthetic that feels both contemporary and timeless.

RB50007

This frame has a rounded oval lens shape with softly curved edges, creating a balanced and approachable silhouette. The style is classic with a modern touch, featuring a slightly thicker acetate construction that gives it a bold yet refined look suitable for everyday wear.

RB50008

This frame features a softly squared lens shape with gently rounded corners, offering a structured yet approachable look. The style is classic with a subtle retro influence, highlighted by thicker acetate construction and refined metal buckle hardware at the hinges that adds a polished, premium detail.

RB50010

This frame features a slim rectangular lens shape with clean, straight lines that create a sharp and modern silhouette. The style is minimalist and contemporary, combining a lightweight metal front with streamlined temples, subtle metal hardware at the hinges, and adjustable nose pads for a refined, functional finish.

RB50017

This frame features a modernized aviator silhouette with a distinctive geometric, squared-off base and a flat brow line. The design is characterized by a slender metal wire construction and a prominent double bridge featuring a textured top bar detail for a sophisticated, structural look.

RB50018

This frame features a classic, minimalist round silhouette with a perfectly circular lens shape and a clean, slender profile. The design is built with a fine metal wire construction, utilizing a simple arched bridge and sleek, straight temples for an understated and intellectual look.

RB50019

This frame features an oversized, geometric square silhouette with soft, rounded corners that balance its large proportions. The design is characterized by an ultra-fine metal wire construction, offering a delicate, airy look that provides maximum lens coverage without overwhelming the face.

RB50021 (Clip-on)

This design features a contemporary, squared-oval optical frame paired with a matching integrated sun clip-on. The aesthetic is defined by a substantial acetate structure with a prominent keyhole bridge, while the metal clip-on adds a structural double-bridge effect for a sophisticated, layered look.
