

GÖTTI SWITZERLAND / COLLECTION SPRING 26

# Amalia and Aosta Brave is beautiful!

**Delicate lines, clear expression. AMALIA and AOSTA are two new titanium models from Götti Switzerland for a stylish start to spring. Flowing, curved lines form modern butterfly shapes. Glasses that shows lightness and put you in a good mood.**

AMALIA and AOSTA stand for confident shapes and pure elegance. The soft lines give the glasses a timeless femininity, while the deliberately wider frame adds subtle accents when viewed from the front. A minimalist design with a clear statement.

Manufactured from ultra-light titanium in Japan, these models combine technical precision with an ultra-light feel. Selected colors emphasize the characteristic shapes and perfectly highlight the striking frame. The matte finish creates a modern, natural look and underscores the high-quality design. Precisely crafted. Sophisticated in detail.
