

GÖTTI SWITZERLAND / COLLECTION SPRING 26

Colors of the Spring

Where turquoise meets soft pink, fuchsia dances with apricot, and olive warms itself in mocha. HYLDE and HOVER unfold a world of color that shines differently from every angle.

A combination of several transparent layers and a darker base color allows light to penetrate deep into the material, creating a vibrant interplay of colors.

Bold shapes define the character of HYLDE and HOVER. These frames impress with their presence, coolness, and self-assured extravagance. Bold is beautiful! Every curved line has been crafted with the highest precision, resulting in two expressive and harmonious shapes. Rounded edges create visual depth in the material, while the glossy, hand-polished surface lends the acetate a playful aesthetic. This brings out the subtle color nuances even more beautifully.

Soft yet bold – just like spring itself. The stunning two-tone gradient creates a truly unique interplay of colors and highlights what makes these eye-catchers so special: depth you can see. Character you can feel.

HOVER
